

# Index

- adjointed Legendre polynomials, 35
- aliasing effect, 156
- autoregressive (AR) scheme, 133
  
- boundary value problems for linear SDE, 140
  - correct, 146
  - stationary, 149
  
- Central limit theorem in  $C^p$ , 81
- Cesaro sum, 160
- Chebysheff polynomials, 38
- controllable linear systems, 147
- criterion of minimax, 105, 128
  - of relative compactness for a set in  $C^p$ , 75
  - of weighted variance, 105
  
- dense family of probability measures, 71
  
- fractional Brownian motion, 137
- fundamental solution of linear differential equation, 140
  
- Gaussian distribution, 130
  - conditional, 22, 26, 28, 132, 147
  - simulation, 59, 131, 133
- Gegenbauer polynomials, 38
- Gram's matrix, 141
  
- interpolation of correlation functions, 155
  - of stationary random sequences, 155
  
- isotropic fields, 9, 17, 33, 62
  
- Kotelnikov–Shannon formula, 162
  
- Lyapunov equation, 144, 149, 150
  
- method of dependent tests, 101
- method of importance sampling, 106, 112
- model of clouds, 40
  - of the sea surface, 43
- Monte Carlo estimator, 100
  - $F$ -deviation, 102
  - $F$ -optimal, 102
  - absorption, 111
  - collision, 114
  - local, 122
- Monte Carlo method, 100
  - asymptotic computational cost, 101
  - computational cost, 100
  - — for functional estimator, 101
- moving average (MA) scheme, 133
- multiplicative generator, 167
  
- periodic  $\delta$ -function, 162
- Poisson formula, 156
- principal matrix, 140
- Prokhorov's metric, 70
  
- Smith's numbers, 170
- spectral model, 1, 82
  - conditional, 24, 91
  - derivatives of fractional order, 33
  - error, 4
  - generalized scheme, 4

- non-randomized, 82
- nonhomogeneous, 47
- on a sphere, 38
- randomized, 3, 82
- successive refinement, 21
- vector-valued, 61
- spectral radius of linear operator, 111
- spectral representations, 1, 9, 17, 33, 50, 51, 53, 54
- stable matrix, 143
  
- theorem about continuity of random fields (V.V. Yurinskiy), 73
  - about period of multiplicative generator, 168
  - about weak compactness of probability measures (Yu.V. Prokhorov), 71
  - about weak convergence of probability measures in  $C$  (Yu.V. Prokhorov), 72
  - about weak convergence of probability measures in  $C^p$ , 76
  - about weak convergence of random fields in  $L^p$  (A.V. Ivanov), 90
  
- weak compactness of probability measures, 71
- weak convergence of probability measures, 69, 104
- Wiener process, 133, 145
  - generalized, 137
  
- Yule–Walker equations, 136
